Abel Atkelet

LLM Evaluator and Software Engineer

Addis Ababa, Ethiopia | +251 993 861 744 | abelaatkelet@gmail.com | LinkedIn | GitHub | Portfolio

Software engineer and LLM evaluator with AfterQuery and Revelo experience in task authoring, test validation, and model review. Writes clear English rationales for evaluation decisions.

WORK EXPERIENCE

Expert | AfterQuery — Nov 2025 - Aug 2026

- Authored Terminal Bench-style tasks and reviewed coding outputs across 3+ projects.
- Designed difficult coding tasks with clear instructions and tests to expose model failure cases.
- Evaluated long-horizon coding attempts with tests and rubrics, documenting failures and rationale.

LLM Trainer | Revelo Talent Corporation — Oct 2025 - Feb 2026

- Reviewed 4+ model iterations on GitHub coding tasks for correctness and instruction-following.
- Evaluated PRs, AI-generated transcripts, and code specifications using metrics and written rationales.

Junior Full Stack Developer | Quantum Pulse Consulting — Jul 2025 - Aug 2026

- Delivered and maintained 5+ client websites with Frappe, React, WordPress, APIs, and AI tools.
- Automated court-data imports across 10 states for Expungement.ai, populating court names, addresses, and ZIP codes in a Frappe Court module.
- Supported automated petitioner filings through GreenFiling using the imported court records.

Full Stack Developer Intern | Afronex Tech Hub — Jun 2024 - Sep 2024

Dire Dawa, Ethiopia

- Built 3+ website clones with React, Next.js, and Tailwind CSS, applying UI/UX design principles.
- Led the design and launch of a SaaS platform used by more than 25 developers.
- Delivered React.js tutorials to 10 electrical engineering students.

Web Development Intern | Prodigy Infotech — Jul 2023 - Sep 2023

- Delivered 5 web development projects, ranging from basic to intermediate complexity.
- Applied JavaScript and CSS across the projects and completed each within its assigned timeline.

RELEVANT SKILLS

Evaluation: Response comparison, accuracy, clarity, helpfulness, instruction-following, rubric-based review, written rationales.
AI tools: ChatGPT, Claude, Gemini, Codex, and AI coding agents.
Programming: Python, JavaScript, TypeScript, C, C++, PHP, Go, Java, Rust.
Frameworks: React, Next.js, Tailwind CSS, Frappe, Django, NestJS, WordPress.
Tools and data: Git, GitHub, Docker, AWS, GCP, Kubernetes, PostgreSQL, MySQL, Firestore, Supabase, Prisma.

EDUCATION

BSc in Software Engineering | AASTU — May 2021 - Jul 2025

Addis Ababa Science and Technology University | CGPA 3.6/4.0 | Exit exam 80%
Coursework: Machine Learning, Data Structures and Algorithms, Database Design, System Architecture.

SELECTED PROJECTS

Kymani | Cybersecurity and Portfolio Governance
Tested role-based access, tenant isolation, and session handling in a Frappe and React platform.

ConnectX Multi-Tenant E-commerce Platform | Next.js, Tailwind CSS
Built tenant dashboards and role-based access for customers, merchants, and administrators. Code

AWARDS AND RECOGNITION

University Presidential Award: AASTU recognition for exceptional academic performance (GPA 3.93).
Prodigy Infotech: Internship certificate and letter of recommendation (Aug 2023).
English-Medium Degree | AASTU — Jul 2025
Software Engineering degree completed with English as the official medium of instruction.
